

SIGMASKID
Skid mounted thermal systems

SIGMASKID provides superior flexibility and mobility to the Thermal Process Industries

Advantages:

- Eliminates the extensive preparation typical with assembly on site
- Quick installation and start-up
- Plug & play technology
- High mobility
- Clearly defined measurements
- Components available in specialty materials
- Multiple skids may be combined
- Facilitates transport

Construction:

- Vertical and horizontal footprints are available
- Complete mechanical and electrical installation
- Skids available in either stainless steel or painted carbon steel
- Container-ready designs available upon request
- May be arranged (20 ft / 40 ft)
- Available in SIGMA**STAR**® and SIGMA**VAP** evaporating technology and SIGMA**TEC**-dealcoholizing technology
- ATEX-version optional
